ADVANTAGES

■ **CONNECTIVITY OF EK-3000 KEYBOARDS**

EK-3000 keyboards series allows total flexibility around how complex or how simple users wish to make them. The ultimate test of this is the fact that you can connect up to eight keyboards in serial line, giving total control over every aspect of a point-of-sale. Retailers who wish to have more direct PLUs on those keyboards or Restaurants who require specific menus are able to design their own customs layout. Together with this solution for multiple keyboards, you can also connect more traditional standard PC keyboard for alphanumerical functions, such as entering texts or searching for specific items in the menu if necessary. The scanner interface allows connection of the keyboard wedge scanner providing a simple yet effective way to reduce the amount of cables leading to the point-of-sale or cash register.

■ **MADE-TO-MEASURE MOUNTING TOOL**

EK-3000 keyboards can be located simply on the desk or by means of adjustable line of Octacom hoders they can be mounted at any place, position, height or angle. Octacom line is an ergonomic, place-saving solution suitable for any environment.

■ **RANGE OF COLOURS**

EK-3000 keyboards are made of state-of-the-art durable materials and colours rangign from attractive translucent Apple Mac green and blue to an exclusive wooden finish for high standard stores. EK-3000 allows customers needs to be matched to their corporate identity.

■ **ELCOM INTELLI™ SOLUTION**

Intelli solutions opens new era of unprecedented functionality. It boasts a user friendly graphic keyboard and case sensitive menus on a neat and tidy touch screen display. This VGA display demonstrates both new technology, functionality and affordable price.
