Euro-100: Looking Trough Your Eyes

One of the most common requests of small and middle-sized retailers, especially at start up, is easy operation together with elegance and usefulness. Euro-100 comes with higher performance, good connectivity possibilities and unique solutions saving your time and money. You can even extend the excellent standard to additional connectivity options you plan to use. For instance, built-in UV LED module will help you with checking also new Euro bank notes. So, you pay only for what will yield profit to your business.

Higher Standard For Low-end Cash Registers

Modern technologies show that also small till can be stylish, full of state-of-the-art retail features and adaptable to your visions. That's all at price you can afford. USB will make PC connection easier for simple PLU's, departments or cashiers programming. Euro-100 is equipped with well-arranged, brilliant, pop-up rotary display with blue back-light for higher customer comfort. You can adjust it for customers' better possibility to check over their shopping. Euro-100 will come in useful also in heavy conditions since new keyboard is highly resistant to dirt, dust and high humidity.

Practical and Easy-to-Maintain

Due to undemanding dimensions you can place Euro-100 even on smaller counter. A practical handle is ready for easy moving of till. During operation you can use handle for putting a pen, small change or other varied stuff down. You can move Euro-100 safely because of increased impact resistance and unweighted design.
